

HUNGARY-INDIA HEALTHCARE WEBINAR & B2B

Monday, 5th September 2022 | Virtual

Hungary's healthcare and med-tech industry with its century-long tradition is one of the most efficient and successful sectors of the Hungarian economy. Several Hungarian companies have won international acclaim and recognition with their high-quality products and technologies.

The healthcare sector in India has rapidly progressed in the last decade. India as the largest supplier of vaccines to the world during the pandemic is known as the "Pharmacy of the World". Today, the country is favorably positioned in the medical devices' domain for outsourced contract design, development, and manufacturing.

Indian and Hungarian companies should explore the possibility of collaborating since there are several areas under the healthcare ambit, with complementarities where partnerships can be forged to mutual benefit, such as lab equipment, diagnostic instruments, and drug manufacturing etc.

Under this backdrop, Confederation of Indian Industry (CII) in cooperation with Embassy of Hungary in India is organizing the "Hungary-India Healthcare Webinar & B2B" from 1500 hrs to 1615 hrs on Monday, 5th September 2022. The webinar will consist of an interactive session with the participating Hungarian and Indian companies, followed by one-to-one virtual B2B meetings, with the company of your interest, from 1615 hrs onwards.

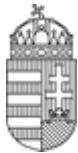

I am writing to request you to kindly join this webinar on Monday, 5th September 2022. Please also let us know your interest for a one-to-one meeting with any of the Hungarian company, such that we also allot you a suitable meeting slot for this interaction.

Please find the Zoom link of the event below:
